

World class dining.

Rock and roll setting.

Seating 94 guests in just under 3,000 square feet, Dante Boccuzzi Akron, or DBA, is a modern restaurant, in a modern setting, right on the edge of downtown Akron in the growing Northside District. The restaurant showcases an elegant dining space, private dining room, great cocktails, a late night bar and a spacious, comfortable patio all while respecting and adding to the urban context. Located on the first floor of the Northside Lofts building, people are drawn into the space by the unique design and atmosphere. The red sweeping bar canopy is an element that is viewed not only from the street, but also from the opening in the back of the bar which opens to the outdoor patio adjacent to the neighboring hotel. The rock and roll vibe reverberates throughout the area.

A shared love of rock and roll between the chef and co-owners sparked DBA's one-of-a-kind design, from architectural elements down to the menu. During the afternoon, guests can enjoy an upscale meal in a funky, fresh setting. At night the space transforms into a swanky and unique experience for all the senses. The full theme comes into effect through a dazzling chef's menu and electric design. For the rock-n-roll theme, not only was the architecture considered, but we also designed the marketing materials and menus to reflect the intent of the architecture and provide a consistent message for guests.
