

Artificial Turf

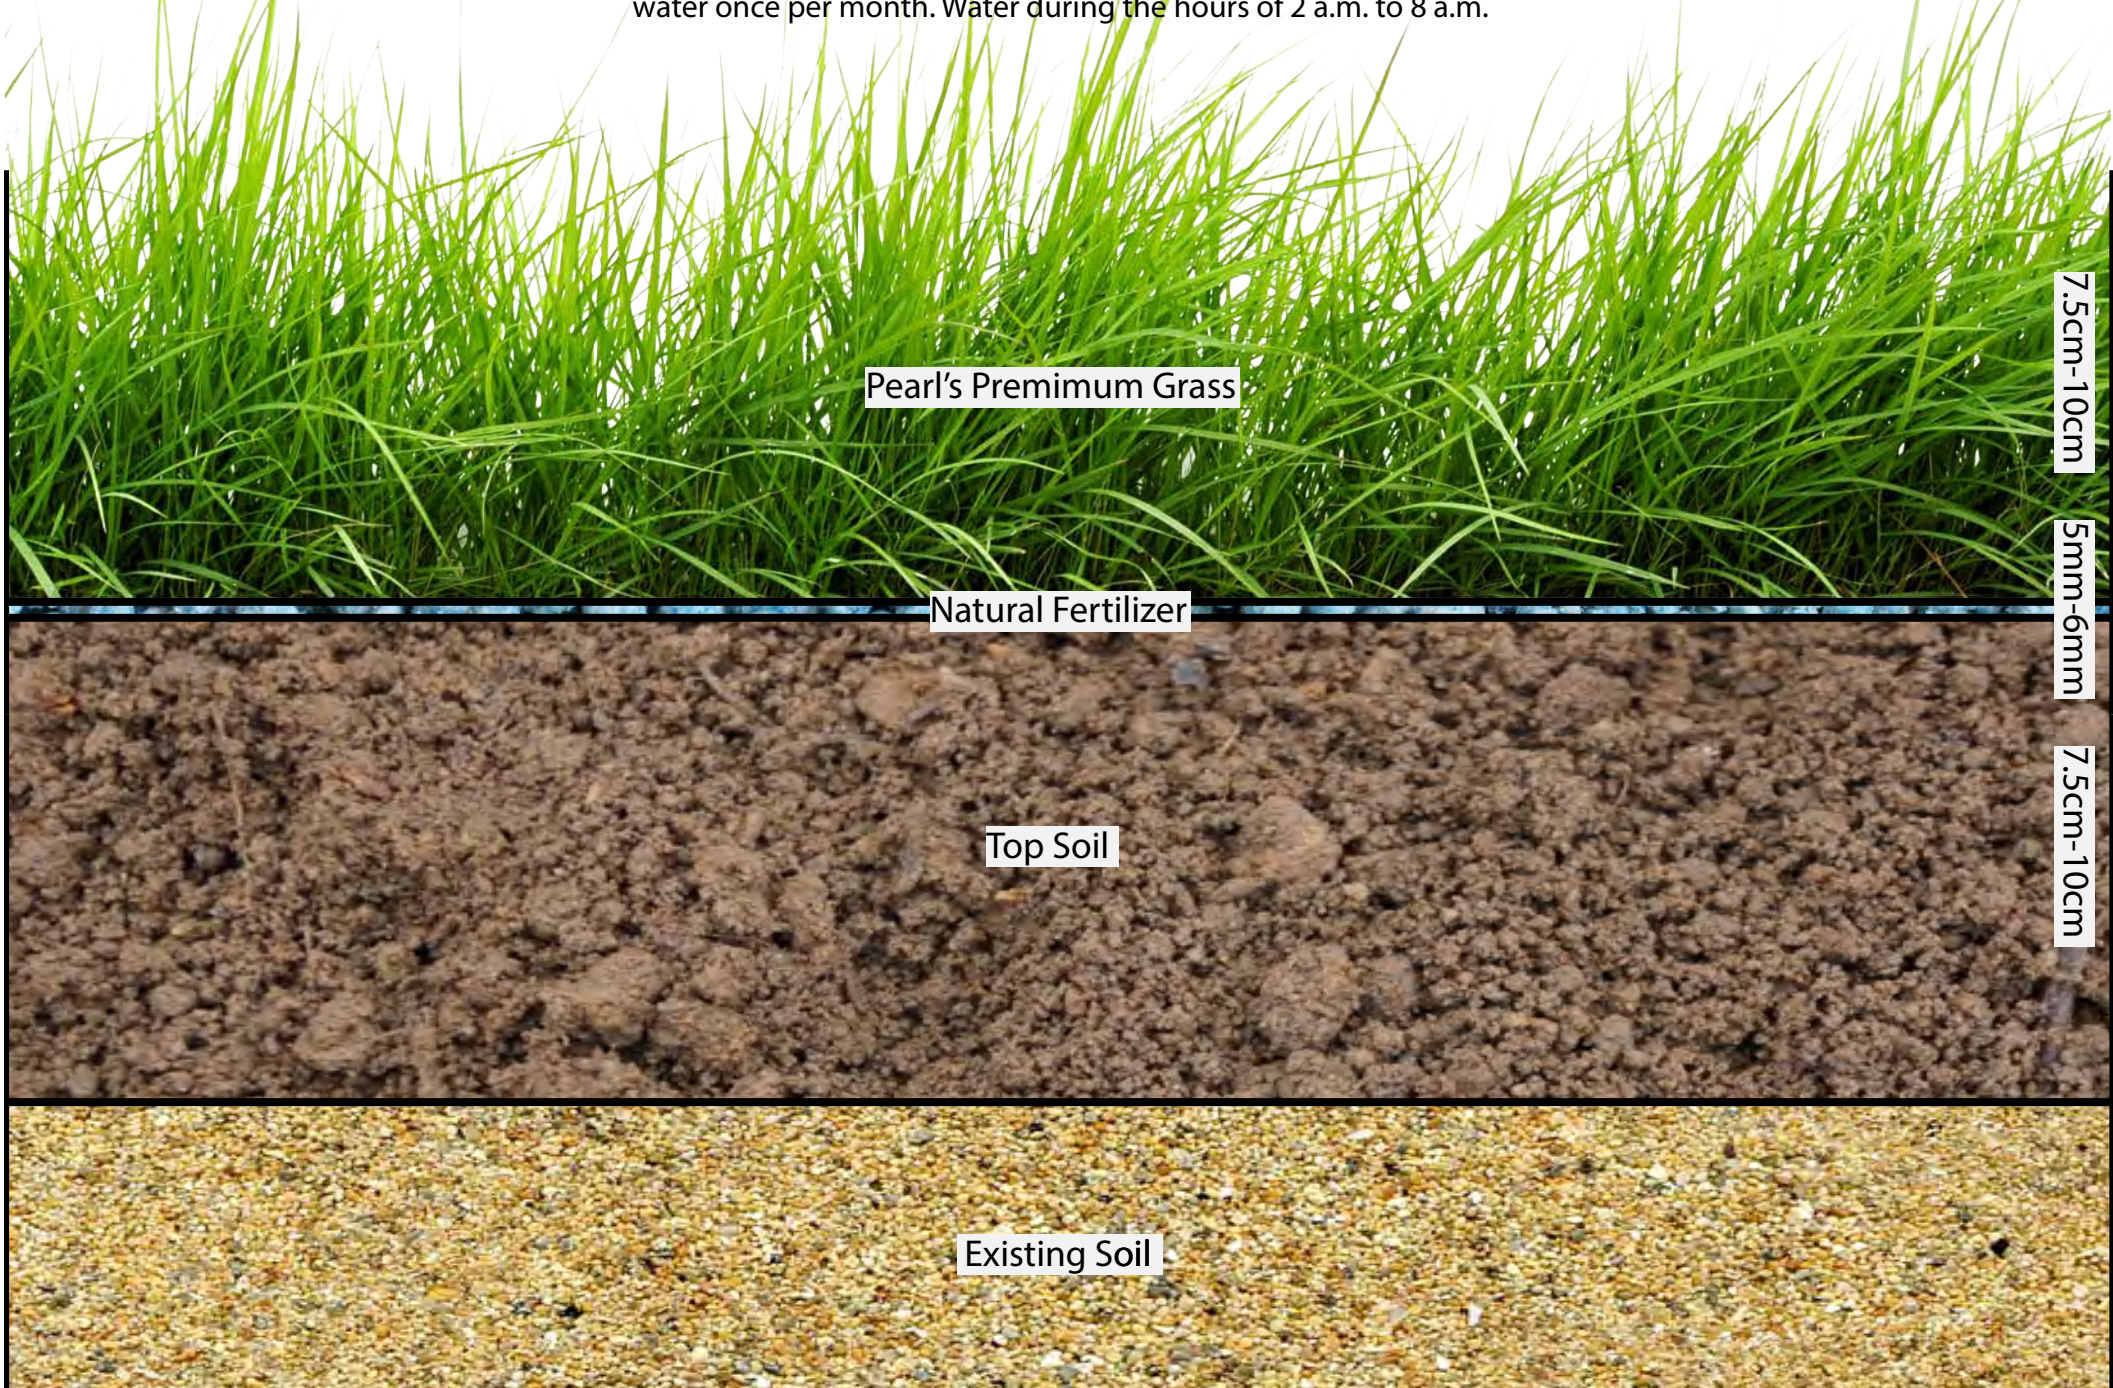

Approximate Cost: \$500,000+ per Soccer Pitch

Pearl's Premium Grass

Approximate Cost: \$700.00 per Soccer Pitch

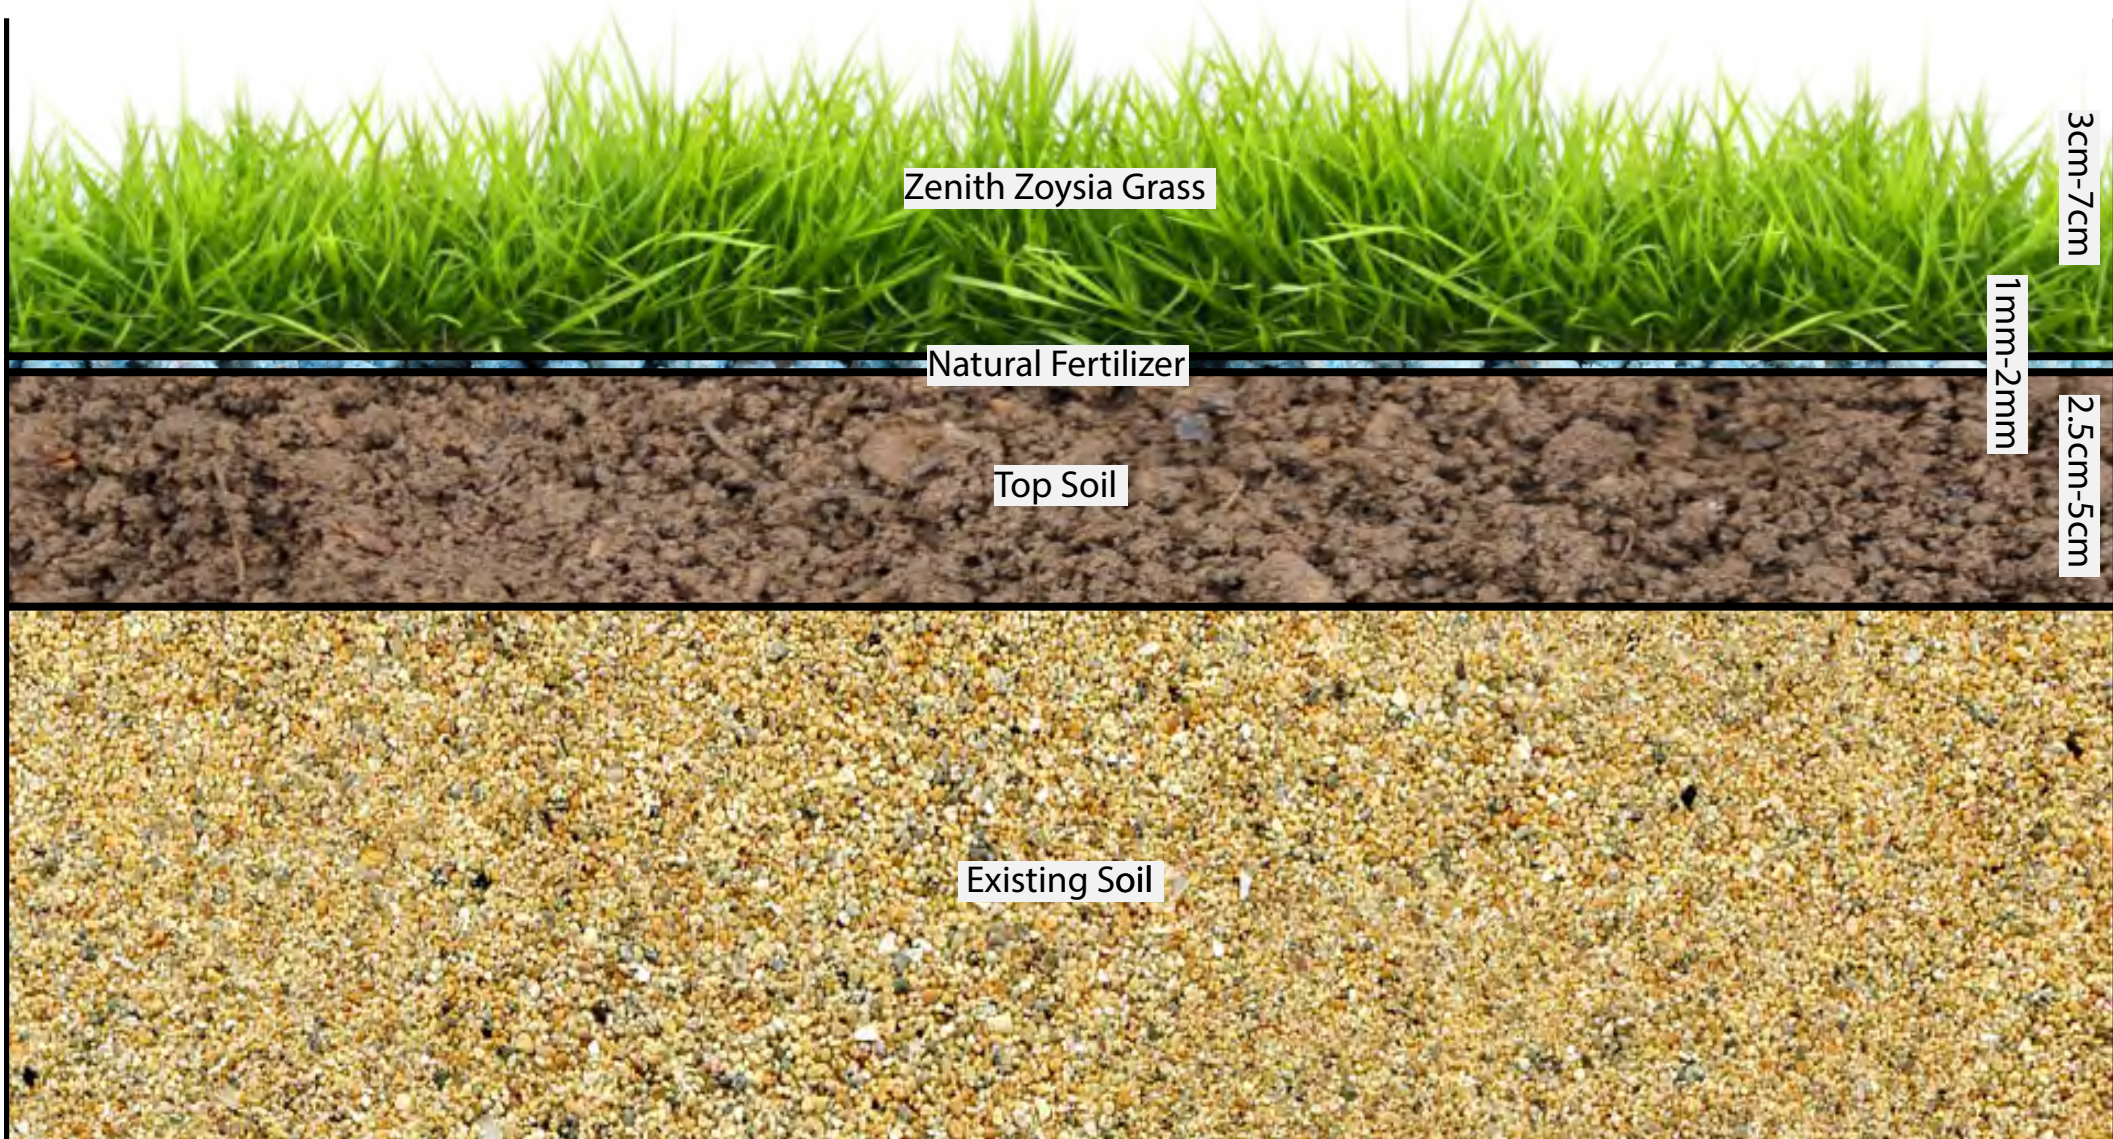

Water every morning for one month until seeds are established, then water once per month. Water during the hours of 2 a.m. to 8 a.m.

Zenith Zoysia Grass

Approximate Cost: \$2,000 per Soccer Pitch

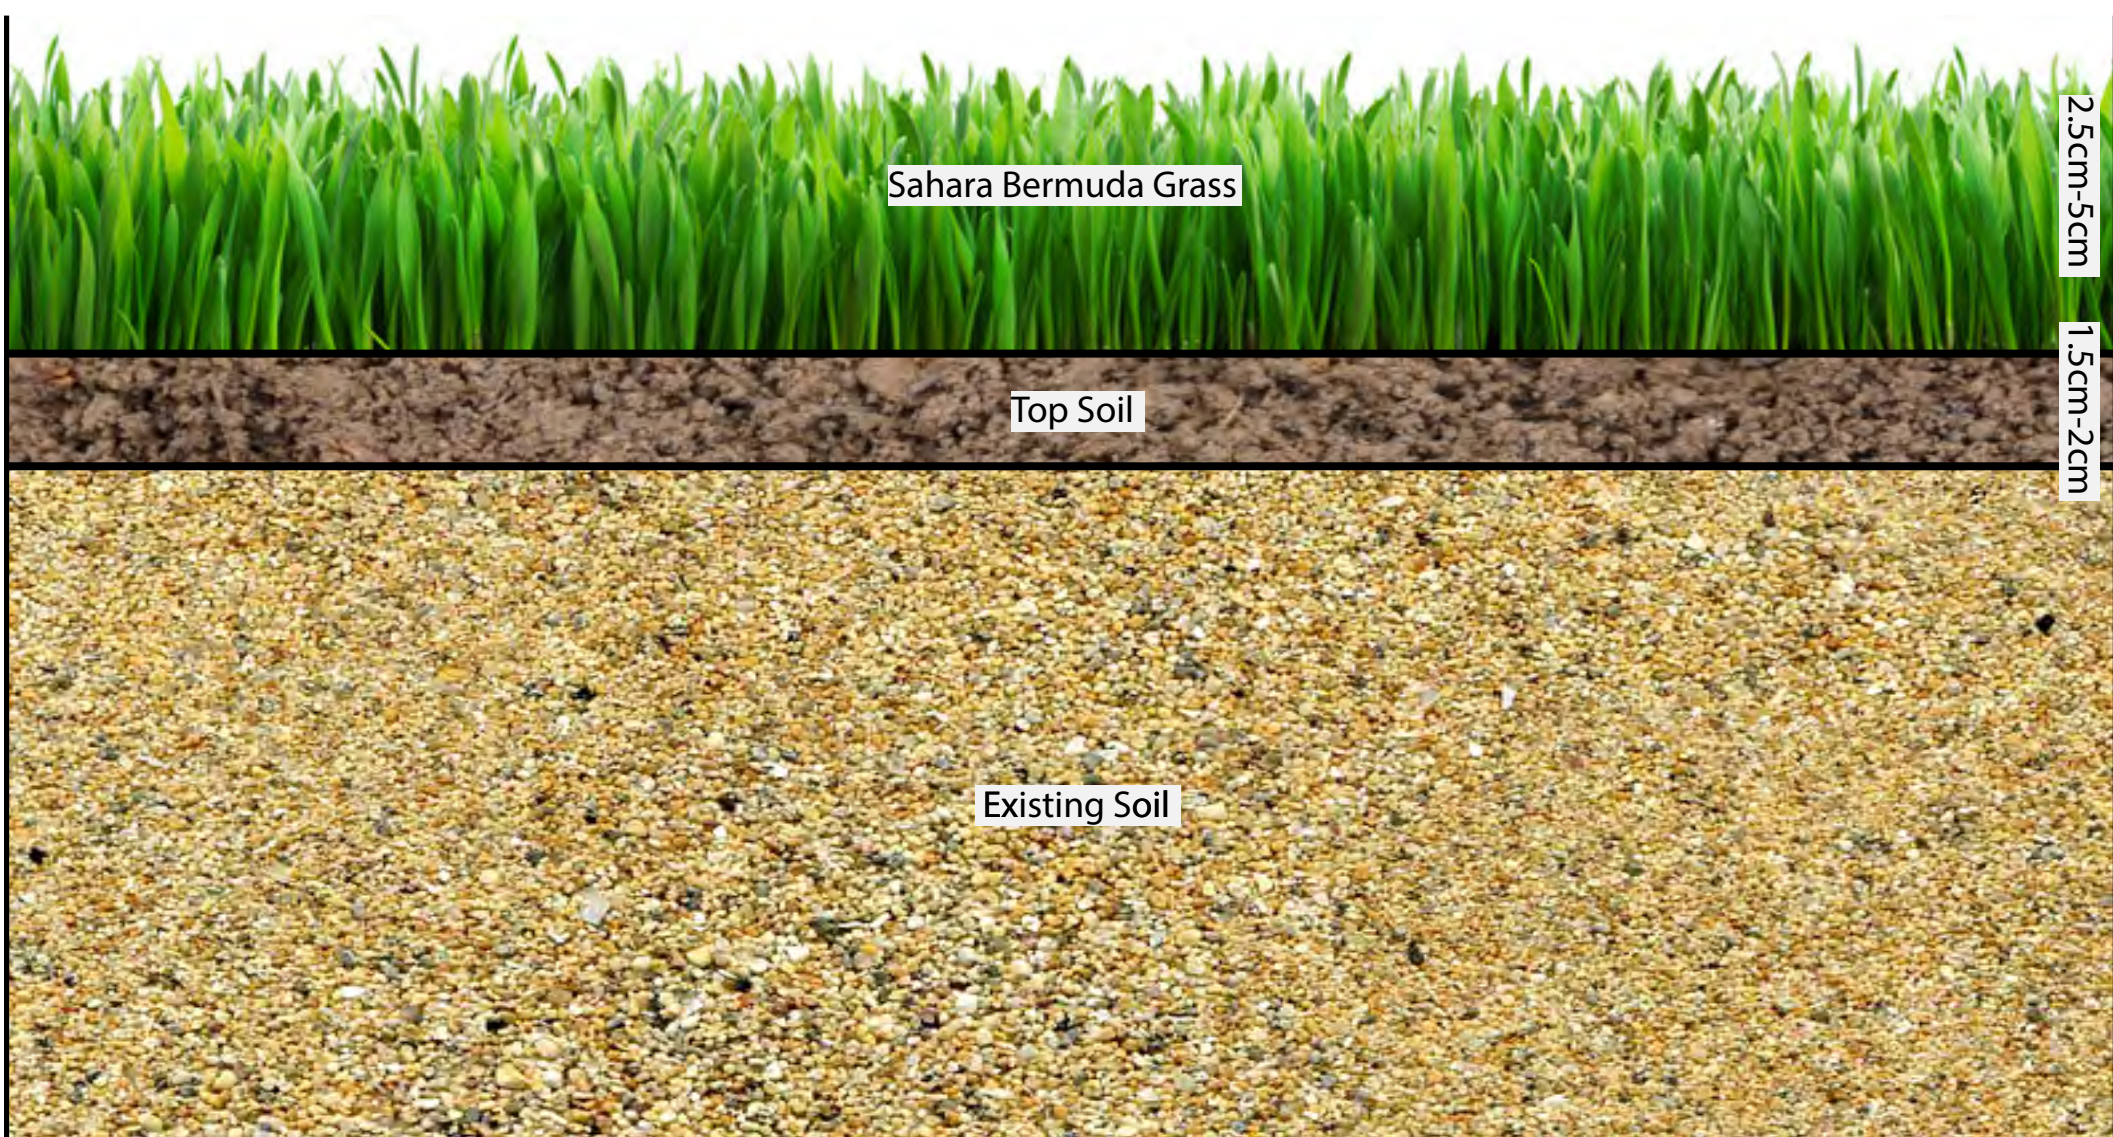

Water every third day while the sod is producing new roots. Apply water in the morning hours to reduce evaporation. Once established water the sod when the soil dries to a depth of 7cm, or once per week. Water the sod during the hours of 2 a.m. to 8 a.m.

Sahara Bermuda Grass

Approximate Cost: \$300.00 per Soccer Pitch

Newly seeded grass should be irrigated with light frequent applications. This process should continue for 10 days after visual emergence. Once established less frequent but deepened watering should be initiated once every week.
